BUSINESS INSIGHTS REPORT

Apex Lark – Data Analytics Internship | Day 04

Topic: Advanced Excel Analysis with PivotTables, PivotCharts & Interactive Dashboard

1. Dashboard Layout Overview

An interactive Excel dashboard was developed using PivotTables, PivotCharts and connected slicers to analyze retail business performance.

The dashboard includes KPI summary cards displaying Total Sales, Total Profit, Total Orders and Total Customers. It also contains visualizations for regional sales, monthly sales trends, category-wise profit and sales, product performance and customer contributions.

Three interactive slicers – Region, Product Category and Month – were incorporated to allow dynamic filtering and provide a better understanding of business performance.

2. Key Business Findings

The interactive dashboard revealed the following insights:

- **Highest Revenue Region:** West region generated the highest revenue.
- **Best Performing Product Category:** Office Supplies recorded the strongest category performance.
- **Highest Sales Month:** December 2023 recorded the highest sales.
- **Top Customer:** Sean Miller contributed the highest sales among customers.
- **Monthly Sales Trend:** Sales performance fluctuated across different months, with December 2023 emerging as the strongest month during the analyzed period.

3. Key Performance Indicators (KPIs) and Operational Findings

The dashboard uses four major KPIs to monitor overall business performance:

1. **Total Sales:** Measures the overall revenue generated by the business.
2. **Total Profit:** Evaluates the profitability of business operations.
3. **Total Orders:** Represents the total number of customer transactions.
4. **Total Customers:** Measures the overall customer base.

The analysis indicates that regional and category-wise performance varies significantly. The West region leads in revenue generation, while Office Supplies demonstrates the strongest category performance. Customer-level analysis also identifies Sean Miller as the highest sales contributor.

4. Strategic Business Trends

The interactive dashboard highlights the following business trends:

- Regional sales performance is strongest in the West region.
- Office Supplies is the leading product category in the analysis.
- December 2023 represents the peak sales month, indicating a strong year-end sales period.
- Customer contributions vary, with Sean Miller emerging as the highest-contributing customer.
- Monthly sales fluctuations highlight the importance of monitoring demand patterns and planning inventory accordingly.

These findings provide useful insights into regional performance, product demand, customer contributions and monthly sales behaviour.

5. Actionable Business Recommendations

1. Strengthen Regional Sales Performance

Focus on maintaining the West region's strong performance by identifying its successful products and customer segments. Apply effective sales strategies to improve performance in other regions.

2. Improve Product Category Performance

Prioritize inventory management for Office Supplies, monitor fast-moving products and introduce suitable product bundles to improve sales and profitability.

3. Optimize Seasonal Sales and Customer Retention

Prepare inventory and marketing campaigns ahead of the December sales period. Introduce personalized offers and customer retention strategies for high-value customers, including Sean Miller.
